DRAFT FOR DISCUSSION

The Occupy Wall Street movement has galvanized the attention of the country and the world and has been able to organize Americans into the largest demonstrations in the country in response to the Great Recession. The successes of these mobilizations has led to considerable interest in the characteristics of persons interested in, supporting, and participating in the Occupy Wall Street protests and in the broader Occupy Wall Street movement.

One of the ways to measure increasing interest and levels of participation and involvement in Occupy Wall Street is by tracking the level of traffic to the main site for the protests <u>occupywallst.org</u>. Traffic on the site averaged close to 400,000 visits per day for the week of October 2. On October 5, for example, there were close to 350,346 visits to occupywallst.org and a survey was added to the site to measure levels of interest and involvement in Occupy Wall Street and to get a sense of the characteristics of persons visiting the site. Close to 1,890 persons began the survey and we have completed information on 1,619 respondents who answered the survey that was put up on the main occupywallstreet site.

This document discusses the characteristics of persons visiting the occupywallstreet site and provides the most comprehensive and complete profile to date of persons involved in the Occupy Wall Street Movement.

Using data from a survey of 1619 users who completed our questionnaire in the occupywallstreet web site we found that:

- 92.5% of respondents either somewhat or strongly supported the protests with most respondents indicating strong support.
- 1/4th of the sample (or 24.2%) participated in the Occupy Wall Street protests as of October 5, 2011.
- 91.8% of the sample thinks that the Occupy Wall Street Protests will continue to grow.

In terms of demographic characteristics of the sample, we found that,

- 64.2% of respondents were younger than 34 years of age.
- While the sample is relatively young, one in three respondents is older than 35 and one in five respondents is 45 and older.
- 7.9% of respondents have a high school degree or less.
- 92.1% of the sample has some college, a college degree, or a graduate degree.
- 27.4% have some college (but no degree), 35% have a college degree, 8.2% have some graduate school (but no degree), and close to 21.5% have a graduate school degree.
- This is a highly educated sample.
- 26.7% of respondents were enrolled in school and 73.3% were not enrolled in school.
- 50.4% were employed full-time and an additional 20.4% were employed part-time.
- 13.1% of the sample are unemployed.
- 2.6% of respondents were retired, 1.3% disabled, 2.6% homemakers and 9.7% are full-time students.

- 47.5% of the sample earns less than \$24,999 dollars a year and another quarter (24%) earn between \$25,000 and \$49,999 per year.
- 71.5% of the sample earns less than \$50,000 per year.
- 15.4% of the sample earned between \$50,000 and \$74,999.
- The remainder 13% of the sample earn over \$75,000 with close to 2% earning over \$150,000 per year.
- 27.3% of respondents considered themselves Democrats, another 2.4% said they were Republican.
- Interestingly, a very large proportion of the sample, close to 70.3%, considered themselves Independents.
- 66.4% in the sample agree somewhat or strongly that they regularly use Facebook.
- 28.9% in the sample agree somewhat or strongly that they regularly use Twitter.
- 73.9% in the sample agree somewhat or strongly that they regularly use YouTube.
- Our data suggest that the 99% movement comes from and looks like the 99%.

Table 1 presents the gender of the respondents of the survey. The data suggest that 67% of those answering the survey were male, 30.9% were female and 2% preferred another gender designation.

| | | Frequency | Percent | Valid Percent | Cumulative Percent |
|-------|----------------|-----------|---------|------------------|-----------------------|
| Valid | 1. male | 1269 | 67.1 | 67.1 | 67.1 |
| | 2. female | 584 | 30.9 | 30.9 | 98.0 |
| | 3. transgender | 16 | .8 | .8 | 98.9 |
| | 4. other | 21 | 1.1 | 1.1 | 100.0 |
| | Total | 1890 | 100.0 | 100.0 | |

Table 1--What is your gender?

Table 2 shows that 24.4% of respondents were between the ages of 18-24 and another 37.9% were between the ages of 25 and 34. Close to 64.2% of respondents were younger than 34 years of age. Over a third of respondents, or 35.8%, were older than 35 years of age including 10% over 54 years of age. While the sample is relatively young, one in three respondents is older than 35 and one in five respondents is 45 and older.

| | | Frequency | Percent | Valid Percent | Cumulative Percent |
|-------|-------------|-----------|---------|------------------|-----------------------|

Table 3 Indicates that 81.1 percent of the sample strongly support Occupy Wall Street and an additional 11.4% agree somewhat that they support the Occupy Wall Street protests. Close to 92.5% of respondents either somewhat or strongly supported the protests with most respondents indicating strong support. Close to 4.6% of the sample said they neither agreed nor disagreed. Around .9% of respondents disagree somewhat with another 2% disagreeing strongly with the Occupy Wall Street protests.

| | | Frequency | Percent | Valid Percent | Cumulative Percent |
|---------|---------------------------|-----------|---------|------------------|-----------------------|
| Valid | 1. Agree strongly | 1313 | 69.5 | 81.1 | 81.1 |
| | 2. Agree somewhat | 185 | 9.8 | 11.4 | 92.5 |

Table 3--I support the Occupy Wall Street protests.

Table 4 presents the information on levels of participation in the Occupy Wall Street protests and suggests that 14% of respondents participated strongly and another 10.3 percent participated somewhat. This suggests that close to 1/4th of the sample (or 24.2%) participated in the Occupy Wall Street protests. Another 22.2% of the sample neither agreed nor disagreed that they had participated in Occupy Wall Street. About 14.7% disagree somewhat and close to 38.9% disagreed strongly that they participated in the protests and suggests that close to half of the sample had not participated in the Occupy Wall Street protests as of October 5, 2011.

| | | Frequency | Percent | Valid Percent | Cumulative Percent |
|---------|---------------------------|-----------|---------|------------------|-----------------------|
| Valid | 1. Agree strongly | 226 | 12.0 | 14.0 | 14.0 |
| | 2. Agree somewhat | 166 | 8.8 | 10.3 | 24.2 |
| | 3. Neither agree/disagree | 360 | 19.0 | 22.2 | 46.4 |
| | 4. Disagree somewhat | 238 | 12.6 | 14.7 | 61.1 |
| | 5. Disagree strongly | 629 | 33.3 | 38.9 | 100.0 |
| | Total | 1619 | 85.7 | 100.0 | |
| Missing | System | 271 | 14.3 | | |
| Total | | 1890 | 100.0 | | |

Table 4--I have participated in the Occupy Wall Street protests.

Table 5 asks respondents whether they think (on October 5, 2011) the Occupy Wall Street Protests are going to continue to grow and an overwhelming proportion of the sample, 72.6%, strongly agreed that the protests were going to continue to grow. An additional 19.1 percent of the sample agreed somewhat that the protests will continue to grow. This suggests that 91.8% of the sample think that the Occupy Wall Street Protests will continue to grow. A small 6.2% of respondents said they neither agreed nor disagreed while 2% of the sample disagreed that the protests were going to continue to grow. Respondents clearly see Occupy Wall Street as a growing social movement.
